

Simplifying Fractions WORKSHEET

Reduce the fractions to their simplest forms.

$$\textcircled{1} \quad \frac{3}{33} =$$

$$\textcircled{9} \quad \frac{72}{16} =$$

$$\textcircled{2} \quad \frac{7}{28} =$$

$$\textcircled{10} \quad \frac{8}{12} =$$

$$\textcircled{3} \quad \frac{15}{35} =$$

$$\textcircled{11} \quad \frac{16}{18} =$$

$$\textcircled{4} \quad \frac{44}{33} =$$

$$\textcircled{12} \quad \frac{20}{60} =$$

$$\textcircled{5} \quad \frac{3}{12} =$$

$$\textcircled{13} \quad \frac{22}{88} =$$

$$\textcircled{6} \quad \frac{18}{32} =$$

$$\textcircled{14} \quad \frac{27}{60} =$$

$$\textcircled{7} \quad \frac{15}{25} =$$

$$\textcircled{15} \quad \frac{100}{35} =$$

$$\textcircled{8} \quad \frac{42}{14} =$$
