

# Calculating Mode and Range Worksheet

Solved Example:

34, 33, 32, 28, 24, 38, 34

The number 34 (twice) is the maximum in the given set.

Thus, Mode : 34

Range = Difference between the greatest and the smallest number in the given set.

Thus, Range :  $38 - 24 =$  14

Find the mode and the range of the given set of numbers. If there is no mode write 'none'.
