# Graphing Linear Equations in Two Variables

Sketch the graph of each line. Scale your coordinate plane so that the points you choose to graph fit. Please label accordingly.

1  $x + y = 4$

2  $2x + 4y = 8$

3  $3x - \frac{1}{2}y = 2$

4  $y = 3x + 2$

5  $x - y = 5$

6  $y = -\frac{2}{3}x + 4$

# Graphing Linear Equations in Two Variables

## Answers

1  $x + y = 4$

2  $2x + 4y = 8$

3  $3x - \frac{1}{2}y = 2$

4  $y = 3x + 2$

5  $x - y = 5$

6  $y = -\frac{2}{3}x + 4$
