

Adding Integers on a Number Line

Write the addition equations that are represented on the following number lines.

Example:

$$\underline{5} + \underline{(-8)} = \underline{-3}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Adding Integers on a Number Line

Answers

Example:

$$\underline{5} + \underline{(-8)} = \underline{-3}$$

$$\underline{(-4)} + \underline{6} = \underline{2}$$

$$\underline{(-9)} + \underline{7} = \underline{-2}$$

$$\underline{(-1)} + \underline{(-5)} = \underline{-6}$$

$$\underline{3} + \underline{(-10)} = \underline{-7}$$

$$\underline{2} + \underline{8} = \underline{10}$$
