

Comparing Fractions

Write the comparison symbol (>, < or =) in each box.

$$\textcircled{1} \quad \frac{1}{2} \quad \square \quad \frac{1}{3}$$

$$\textcircled{10} \quad \frac{8}{16} \quad \square \quad \frac{2}{6}$$

$$\textcircled{19} \quad \frac{6}{36} \quad \square \quad \frac{1}{6}$$

$$\textcircled{2} \quad \frac{2}{3} \quad \square \quad \frac{2}{5}$$

$$\textcircled{11} \quad \frac{3}{5} \quad \square \quad \frac{3}{8}$$

$$\textcircled{20} \quad \frac{2}{11} \quad \square \quad \frac{3}{33}$$

$$\textcircled{3} \quad \frac{3}{5} \quad \square \quad \frac{1}{2}$$

$$\textcircled{12} \quad \frac{4}{7} \quad \square \quad \frac{4}{7}$$

$$\textcircled{21} \quad \frac{4}{48} \quad \square \quad \frac{2}{6}$$

$$\textcircled{4} \quad \frac{1}{7} \quad \square \quad \frac{3}{4}$$

$$\textcircled{13} \quad \frac{7}{14} \quad \square \quad \frac{9}{18}$$

$$\textcircled{22} \quad \frac{3}{18} \quad \square \quad \frac{9}{54}$$

$$\textcircled{5} \quad \frac{1}{2} \quad \square \quad \frac{1}{8}$$

$$\textcircled{14} \quad \frac{4}{6} \quad \square \quad \frac{2}{3}$$

$$\textcircled{23} \quad \frac{7}{42} \quad \square \quad \frac{6}{48}$$

$$\textcircled{6} \quad \frac{3}{6} \quad \square \quad \frac{1}{7}$$

$$\textcircled{15} \quad \frac{5}{6} \quad \square \quad \frac{5}{8}$$

$$\textcircled{24} \quad \frac{1}{4} \quad \square \quad \frac{12}{48}$$

$$\textcircled{7} \quad \frac{4}{5} \quad \square \quad \frac{4}{9}$$

$$\textcircled{16} \quad \frac{7}{9} \quad \square \quad \frac{2}{10}$$

$$\textcircled{25} \quad \frac{5}{25} \quad \square \quad \frac{3}{21}$$

$$\textcircled{8} \quad \frac{3}{9} \quad \square \quad \frac{4}{12}$$

$$\textcircled{17} \quad \frac{5}{20} \quad \square \quad \frac{8}{32}$$

$$\textcircled{26} \quad \frac{2}{16} \quad \square \quad \frac{2}{22}$$

$$\textcircled{9} \quad \frac{3}{5} \quad \square \quad \frac{1}{6}$$

$$\textcircled{18} \quad \frac{1}{3} \quad \square \quad \frac{7}{9}$$

$$\textcircled{27} \quad \frac{3}{18} \quad \square \quad \frac{4}{24}$$

Comparing Fractions

Answers

$$\textcircled{1} \quad \frac{1}{2} > \frac{1}{3}$$

$$\textcircled{10} \quad \frac{8}{16} > \frac{2}{6}$$

$$\textcircled{19} \quad \frac{6}{36} = \frac{1}{6}$$

$$\textcircled{2} \quad \frac{2}{3} > \frac{2}{5}$$

$$\textcircled{11} \quad \frac{3}{5} > \frac{3}{8}$$

$$\textcircled{20} \quad \frac{2}{11} > \frac{3}{33}$$

$$\textcircled{3} \quad \frac{3}{5} > \frac{1}{2}$$

$$\textcircled{12} \quad \frac{4}{7} = \frac{4}{7}$$

$$\textcircled{21} \quad \frac{4}{48} < \frac{2}{6}$$

$$\textcircled{4} \quad \frac{1}{7} < \frac{3}{4}$$

$$\textcircled{13} \quad \frac{7}{14} = \frac{9}{18}$$

$$\textcircled{22} \quad \frac{3}{18} = \frac{9}{54}$$

$$\textcircled{5} \quad \frac{1}{2} > \frac{1}{8}$$

$$\textcircled{14} \quad \frac{4}{6} = \frac{2}{3}$$

$$\textcircled{23} \quad \frac{7}{42} > \frac{6}{48}$$

$$\textcircled{6} \quad \frac{3}{6} > \frac{1}{7}$$

$$\textcircled{15} \quad \frac{5}{6} > \frac{5}{8}$$

$$\textcircled{24} \quad \frac{1}{4} = \frac{12}{48}$$

$$\textcircled{7} \quad \frac{4}{5} > \frac{4}{9}$$

$$\textcircled{16} \quad \frac{7}{9} > \frac{2}{10}$$

$$\textcircled{25} \quad \frac{5}{25} > \frac{3}{21}$$

$$\textcircled{8} \quad \frac{3}{9} = \frac{4}{12}$$

$$\textcircled{17} \quad \frac{5}{20} = \frac{8}{32}$$

$$\textcircled{26} \quad \frac{2}{16} > \frac{2}{22}$$

$$\textcircled{9} \quad \frac{3}{5} > \frac{1}{6}$$

$$\textcircled{18} \quad \frac{1}{3} < \frac{7}{9}$$

$$\textcircled{27} \quad \frac{3}{18} = \frac{4}{24}$$
