# Understanding Multiplication

Look at a given array. Write in repeated addition form, and change it into multiplication form to find the product.

Example:

$$\underline{3} + \underline{3} = \underline{6}$$

$$\underline{2} \times \underline{3} = \underline{6}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

# Understanding Multiplication

## Answers

Example:

$$\underline{3} + \underline{3} = \underline{6}$$

$$\underline{2} \times \underline{3} = \underline{6}$$

$$\underline{4} + \underline{4} + \underline{4} = \underline{12}$$

$$\underline{3} \times \underline{4} = \underline{12}$$

$$\underline{3} + \underline{3} + \underline{3} + \underline{3} = \underline{12}$$

$$\underline{4} \times \underline{3} = \underline{12}$$

$$\underline{4} + \underline{4} + \underline{4} + \underline{4} + \underline{4} = \underline{20}$$

$$\underline{5} \times \underline{4} = \underline{20}$$
