

Equal Groups Multiplication

Word Problems

- ① There are 4 tables. 6 children are on each table. How many children are there in total?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are children in total.

- ② There are 6 eggs in a tray. 8 trays are there in total. How many eggs are there in total?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are eggs in total.

- ③ How many wheels are there in total in 9 bicycles?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are wheels in total.

- ④ How many total sides are there in 5 triangles?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are triangle in total.

- ⑤ There are 10 mangoes in a bag. 7 bags are there in total. How many mangoes are there in total?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are mangoes in total.

- ⑥ There are 5 fishes in a pond. 5 such ponds are there in total. How many fishes are there in total?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

There are children in total.

Answers

- ① There are 4 tables. 6 children are on each table. How many children are there in total?

$$\underline{4} \times \underline{6} = \underline{24}$$

There are 24 children in total.

- ② There are 6 eggs in a tray. 8 trays are there in total. How many eggs are there in total?

$$\underline{6} \times \underline{8} = \underline{48}$$

There are 48 eggs in total.

- ③ How many wheels are there in total in 9 bicycles?

$$\underline{2} \times \underline{9} = \underline{18}$$

There are 18 wheels in total.

- ④ How many total sides are there in 5 triangles?

$$\underline{3} \times \underline{5} = \underline{15}$$

There are 15 triangle in total.

- ⑤ There are 10 mangoes in a bag. 7 bags are there in total. How many mangoes are there in total?

$$\underline{10} \times \underline{7} = \underline{70}$$

There are 70 mangoes in total.

- ⑥ There are 5 fishes in a pond. 5 such ponds are there in total. How many fishes are there in total?

$$\underline{5} \times \underline{5} = \underline{25}$$

There are 25 children in total.
