COMMUTATIVE LAW OF MULTIPLICATION

Rewrite each question using the commutative law of multiplication.
Also, find the product.

① $2 \times 12 = \underline{\quad} \times \underline{\quad} = \square$

② $4 \times 18 = \underline{\quad} \times \underline{\quad} = \square$

③ $12 \times 8 = \underline{\quad} \times \underline{\quad} = \square$

④ $13 \times 2 = \underline{\quad} \times \underline{\quad} = \square$

⑤ $15 \times 4 = \underline{\quad} \times \underline{\quad} = \square$

⑥ $10 \times 6 = \underline{\quad} \times \underline{\quad} = \square$

⑦ $16 \times 9 = \underline{\quad} \times \underline{\quad} = \square$

⑧ $7 \times 19 = \underline{\quad} \times \underline{\quad} = \square$

⑨ $14 \times 8 = \underline{\quad} \times \underline{\quad} = \square$

⑩ $13 \times 6 = \underline{\quad} \times \underline{\quad} = \square$

⑪ $9 \times 17 = \underline{\quad} \times \underline{\quad} = \square$

⑫ $11 \times 3 = \underline{\quad} \times \underline{\quad} = \square$

COMMUTATIVE LAW OF MULTIPLICATION

Answers

$$① \quad 2 \times 12 = \underline{12} \times \underline{2} = \boxed{24}$$

$$② \quad 4 \times 18 = \underline{18} \times \underline{4} = \boxed{72}$$

$$③ \quad 12 \times 8 = \underline{8} \times \underline{12} = \boxed{96}$$

$$④ \quad 13 \times 2 = \underline{2} \times \underline{13} = \boxed{26}$$

$$⑤ \quad 15 \times 4 = \underline{4} \times \underline{15} = \boxed{60}$$

$$⑥ \quad 10 \times 6 = \underline{6} \times \underline{10} = \boxed{60}$$

$$⑦ \quad 16 \times 9 = \underline{9} \times \underline{16} = \boxed{144}$$

$$⑧ \quad 7 \times 19 = \underline{19} \times \underline{7} = \boxed{133}$$

$$⑨ \quad 14 \times 8 = \underline{8} \times \underline{14} = \boxed{112}$$

$$⑩ \quad 13 \times 6 = \underline{6} \times \underline{13} = \boxed{78}$$

$$⑪ \quad 9 \times 17 = \underline{17} \times \underline{9} = \boxed{153}$$

$$⑫ \quad 11 \times 3 = \underline{3} \times \underline{11} = \boxed{33}$$
