# Identifying Improper Fractions

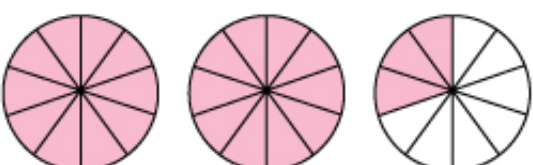

See the fraction diagrams and then find their corresponding mixed numbers and improper fractions. One is done for you.

 $= 4 \frac{4}{5} = \frac{24}{5}$

1
   

 $= \text{---} = \frac{\text{---}}{\text{---}}$

2
   

 $= \text{---} = \frac{\text{---}}{\text{---}}$

3
   

 $= \text{---} = \frac{\text{---}}{\text{---}}$

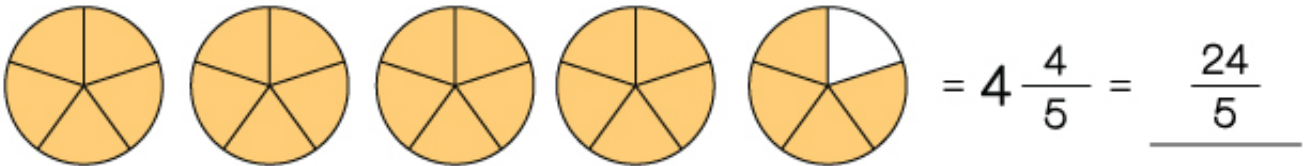

4
   

 $= \text{---} = \frac{\text{---}}{\text{---}}$

5
   

 $= \text{---} = \frac{\text{---}}{\text{---}}$
